GRAMMELOT

Creating sustainable value

Grammelot in a nutshell

Grammelot is a **SME** that collects **twenty years of experience** in working with companies **all around Europe**.

Our core business is to offer professional **consultancy to companies** taking advantage of our team's **know-how and expertise**. Our goal is to help businesses make use of the most **up-to-date digital solutions and tools** to enhance their profitability.
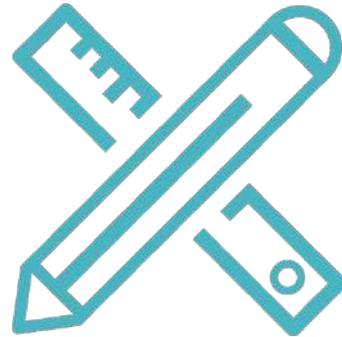

We do not simply sell you a product: we provide you with our proven expertise **in guiding companies to success**, committed to find the best solution and determined to reach your – and therefore our – final objectives.
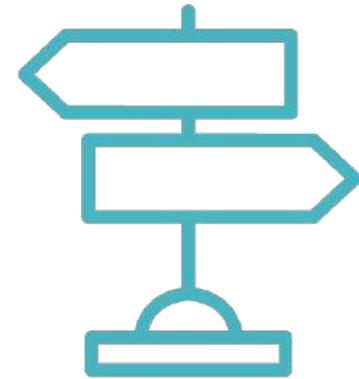

Our Consulting Strategy
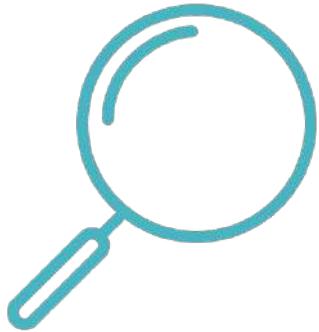

DETAILED

In-depth analysis to identify possible areas for improvement.

TAILOR-MADE

Training Services by Quiddis

is Grammelot **training division**: from turnkey solutions for **Ground School** dedicated to the **Aviation market** to general **Corporate and Professional Training**.
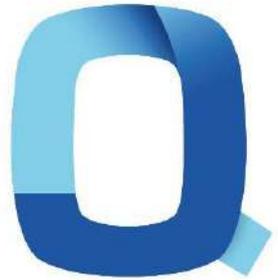

- **Quiddis Join**: our Learning Management System platform specifically designed to be user-friendly and highly customisable. It allows to share different kinds of content (SCORM packages, files, quizzes, VR videos) and creates automatic reports on students progress and results.

- **Quiddis Make**: our development platform to allow everyone to design their SCORM compliant multimedia e-learning content.

Quiddis Make authoring tool for Aerospace and Defense

From basic **interactive slides** to **3D and simulation**, both for **soft and hard skills**, Quiddis Make allows to create **SCORM eLearning content** that can be tracked remotely and used on every SCORM-compliant LMS platform.

Interactivity at all levels

- 3D Cockpit and Aircraft System for pilots and maintainers
- Procedures simulation
- 2D schematics for recap and knowledge check
- Classic quiz formats
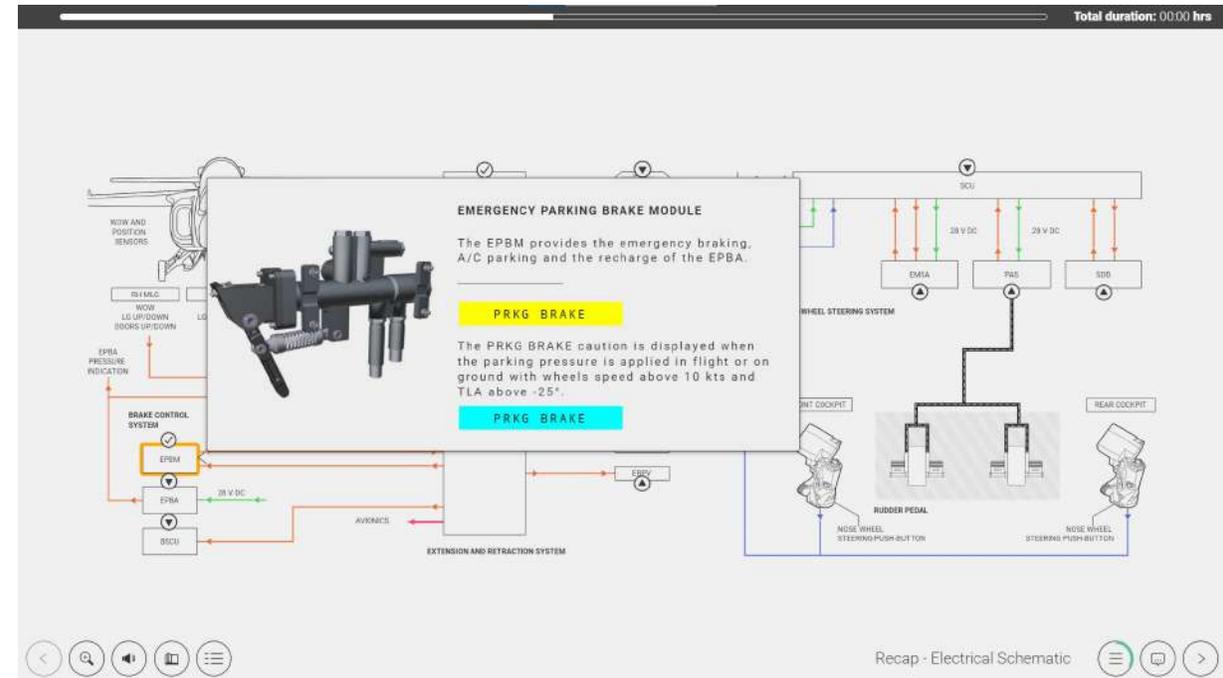

Gamification

Learning by doing through interactive procedures, free courseware navigation, getting yourself into play via scores, leaderboards, reward systems and many other tools to engage users

Cross-platform Ready

Creating cross-platform ready, 3D interactive courseware, suitable for many devices from normal desktops to mobile and visors
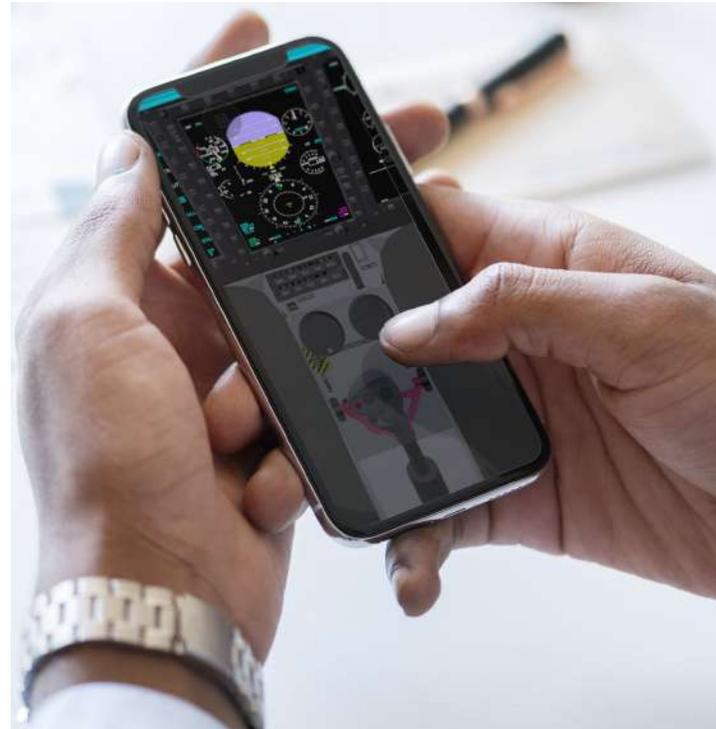

Adaptive Learning

Automatically re-shape your courseware on user specific requirements
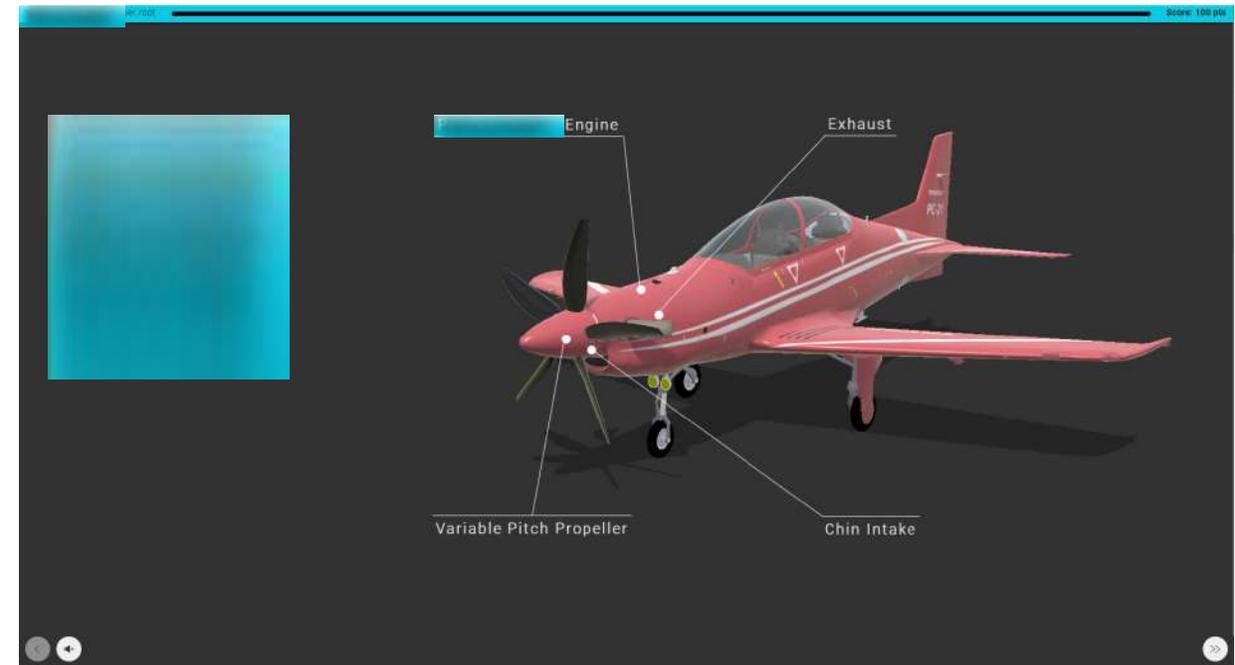

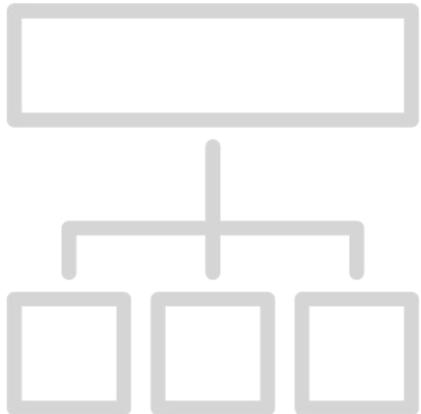

Micro-Learning

Microlearning deals with relatively small learning units and short-term learning activities
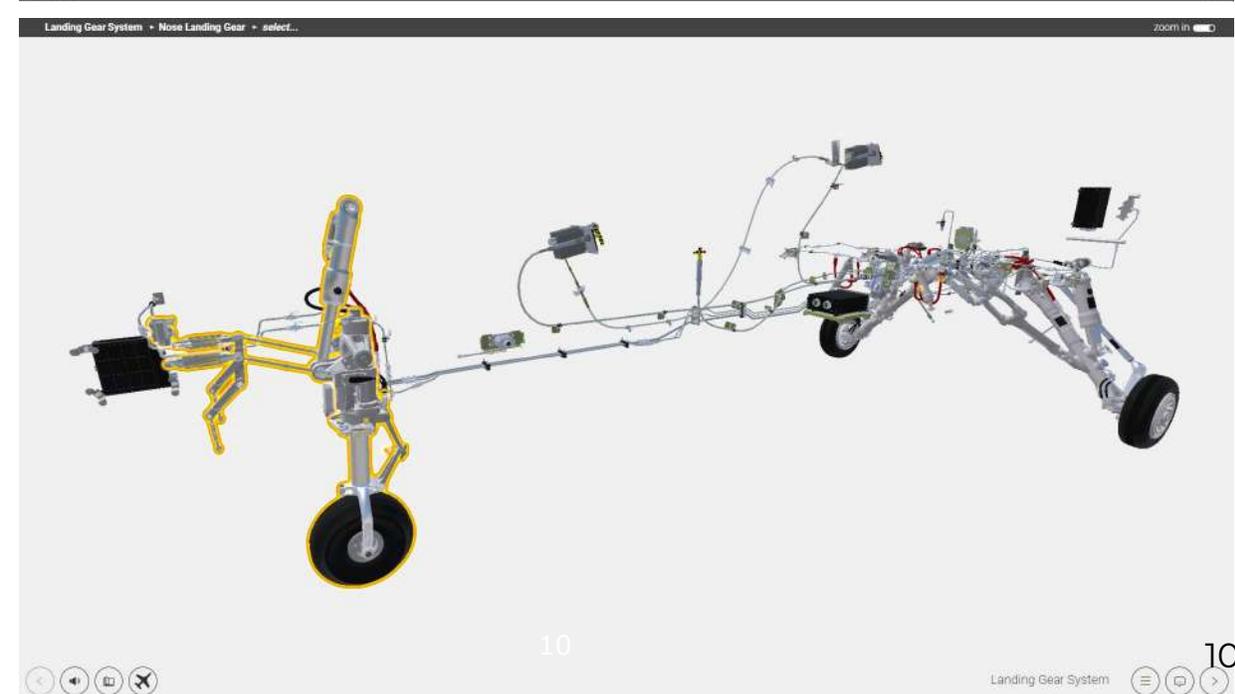

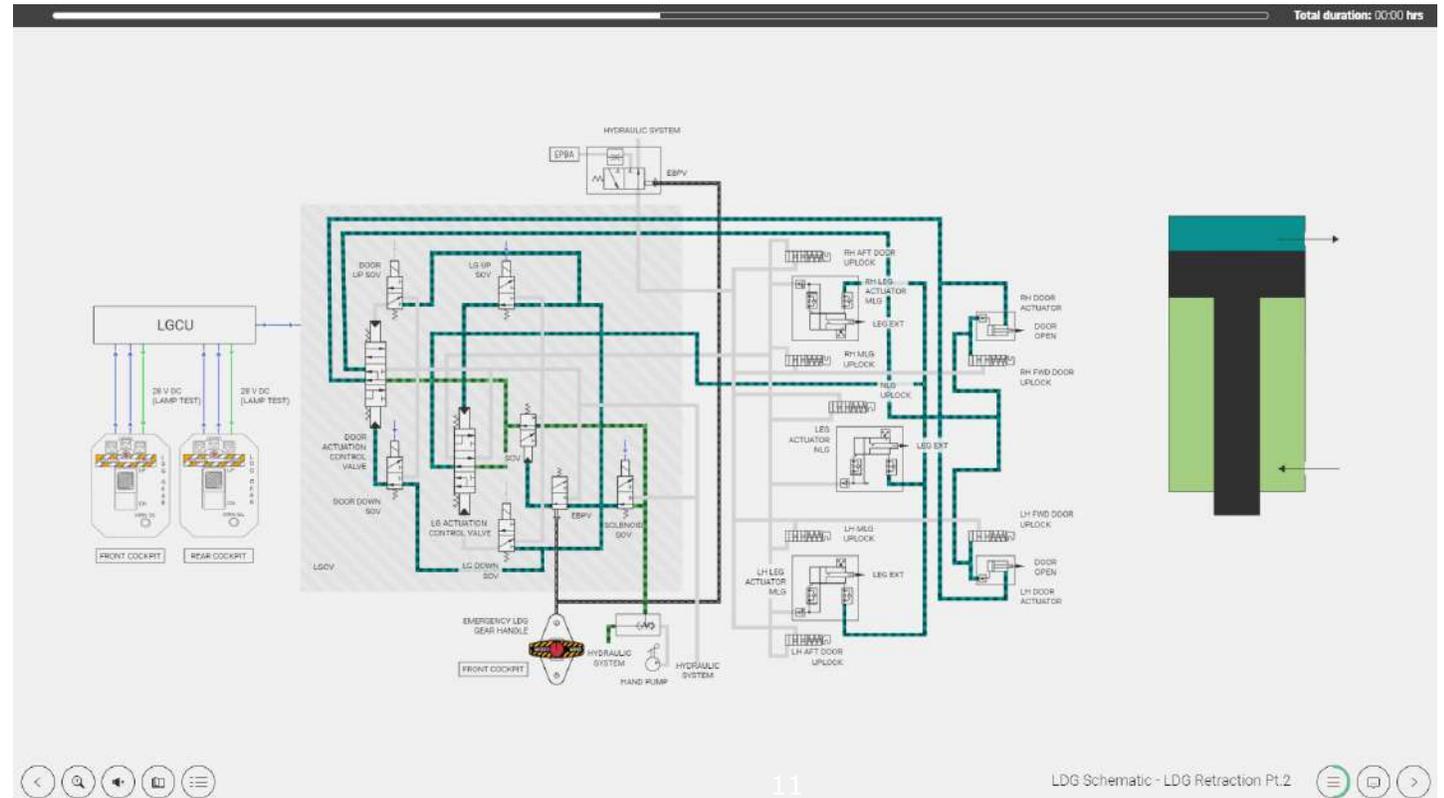

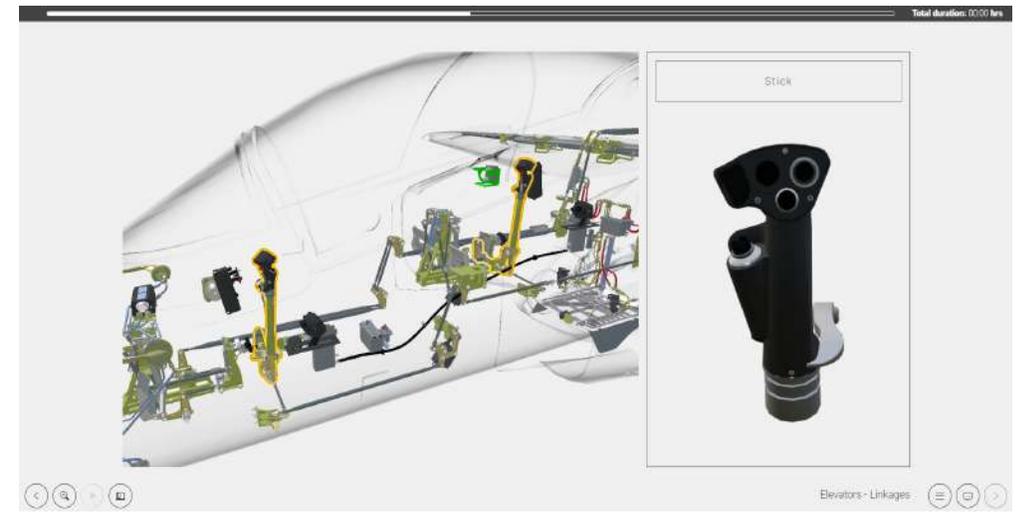

Porting

From deprecated technology, or difficult to maintain,
to modern technology

Asset Creation
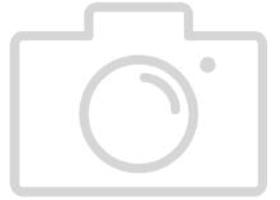

Converting of a generic reference file to maintainable courseware asset optimized for user learning and organizing it in shared library
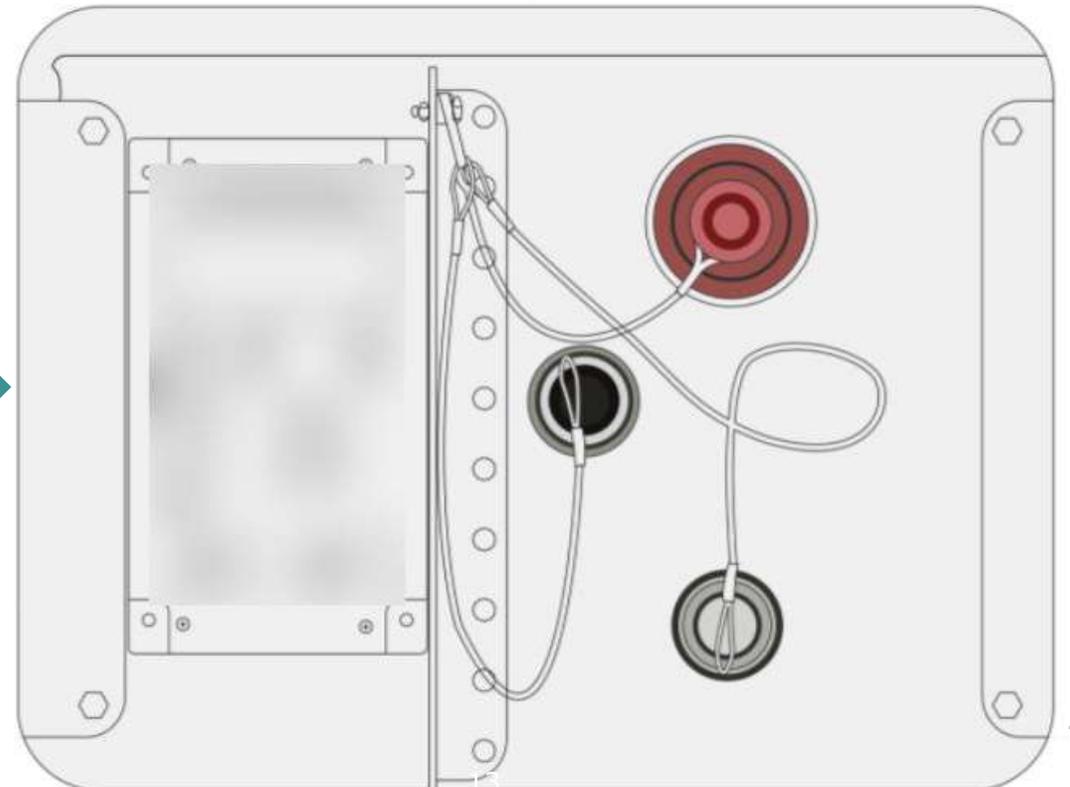

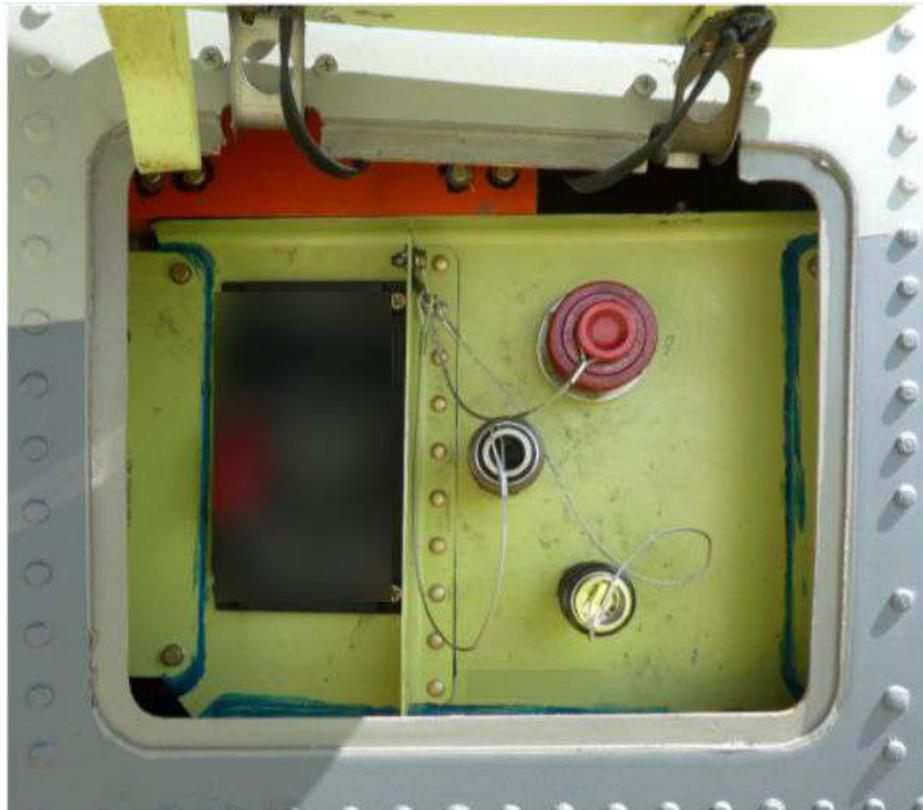

Quiddis eLearning development Team

INSTRUCTIONAL DESIGNERS
to help you build the best training plan, fully digital or blended

ELEARNING ARTISTS
to give the best look-and-feel to your content

STORYBOARD CREATORS
to define how all multimedia elements will interact with each other
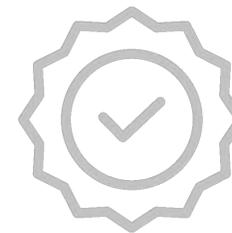

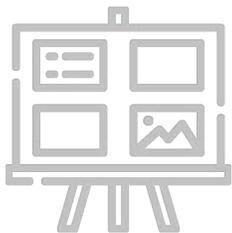

QUALITY ASSURANCE MANAGERS
to ensure the compliance to top quality standards

14

Business model in A&D training

- Tailor made approach to customer needs and target

- Full strategy and development design cooperation with customer

- Sharing "storyboard" as well as digital asset with the customer (e.i. 3D models)

- Fully customer IPR of the material produced by Grammelot (source code)

- Full final customer on-site support for Digital Academy installation and maintenance

- Option of multi-year maintenance fee for content updates and evolution of the updated IT technology (operating systems as well as content tools like Html5)
